

General Consent

Thank you for choosing our office for your dental care. We will work with you to help you achieve excellent oral health. While recognizing the benefits of a pleasing smile and teeth that function well, you should be aware that dental treatment, like any biological treatment or procedure, has some inherent risks. These are seldom great enough to offset the benefits of treatment, but should be considered when making treatment decisions.

Benefits of dental treatment can include: relief of pain, the ability to chew properly, and the confidence and social interaction that a pleasing smile can bring. Nonetheless, there are some common risks associated with virtually any dental procedure, including:

1. **Drug or chemical reaction:** Dental materials and medications may trigger allergic or sensitivity reactions.
2. **Local anesthetic:** I understand that the administration of local anesthetics could cause a reaction or side effect, which may include, but is not limited to, bruising; hematoma; cardiac stimulation; muscle soreness; and temporary or rarely, permanent numbness. I understand that occasionally needles break and may require surgical retrieval.
3. **Muscle or joint tenderness:** Holding one's mouth open can result in muscle or jaw joint tenderness, or in a predisposed patient, precipitate a TMJ disorder.
4. **Sensitivity in teeth or gums, infection, or bleeding.**
5. **Swallowing or inhaling small objects.**
6. **The choice of different dental materials:** i.e.: amalgam, tooth color composite or gold. The pros and cons of the above.
7. **Photography:** I understand dental photography is used as a diagnostic tool to reduce liability issues and is a necessity in the practice of dentistry. I therefore give my consent to Premier Dental Care to use my photographs for demonstration and educational needs.

While we follow procedural guidelines which most often lead to a clinical success, just like in any other pursuit in health care, irregularities can occur. We will do our best to ensure they do not. Please feel free to ask questions in regard to all dental procedures that are recommended to you.

I have read and understand the statements on this page:
